

Group Consultation Programme Support: what we offer

There are three ways we can help you with group consultations

GET STARTED FROM SCRATCH

We provide training for pioneer clinical teams who are starting from scratch. Following a whole team full day learning event, teams have all the skills, know how and confidence to get going and make the switch

SPREAD FROM A STRONG PIONEER BASE

- Once pioneer teams within a PCN or NHS trust have gained experience of consulting with groups, we help you systematise the practice and sustain spread through a range of support models, including train the trainer

DEVELOP INTEGRATED STRATEGY

- Spread will only happen when strategy aligns. We can help you to join the dots and create strategies that make the most of group consultations as an enabler of workforce development and improved outcomes at both PCN and STP/ICS level

ACCESS NATIONAL SUPPORT

ELC has been commissioned by NHS England to support local spread of group consultations. There are two sources of support:
STP/ICS spread strategy development: ELC is here help STP/ICS leads develop robust strategies for group consultation spread. By clarifying how group consultations fit in and help achieve Long Term Plan deliverables through workforce development and improved clinical outcomes, you will build even more robust plans and accelerate your progress
Expert Clinician Mentors: ELC is helping develop a national wide network of patient champions and clinician mentors to spread the word. Get your teams involved

A FREE DIAGNOSTIC TO HELP YOU MOVE FORWARD

We are here to help you work out how to make the biggest impact with the smallest investment. We can share what works and help you plan a spread programme that integrates with deliverables in The NHS Long Term Plan. Arrange a telephone diagnostic today

To access our support and for more information and a discussion about your local practice development needs, contact:
